COMMUNITY BOUNDARIES SET FOR ASC COMMITTEEMEN ELECTIONS

Community boundaries have been set for the ASC community committeemen elections to be held during late November, reports James R. Ford, Jr., Chairman, Appomattox County ASC Committee.

Appomattox County has three ASC communities.

ASC Communities are local administrative areas which help provide farmers with effective farm program administration. According to Mr. Ford these areas are reviewed yearly to determine whether boundary changes would benefit farmers.

A list of ASC communities and the number of farms within each community is available to the public at the ASCS office. The ASC communities in Appomattox county are as follows: Oliver Hill, Southside, Stonewall.

County ASC committee review of community boundaries is one of the first steps in administering the annual ASC farm committee elections. Other actions concerning the upcoming election will be announced as they occur. Participation in ASC elections is open to all eligible farmers regardless of race, religion, sex, color, or national origin.

COMPLETES COURSE IN KEY TELEPHONE SYSTEMS

Lonnie Christian Reynolds, Jr., of Route 3, Appomattox, an installer repairman at the Amherst office on Continental Telephone of Virginia, has completed a course in the fundamentals of key telephone systems. The 15 day course was held at the Continental Telephone System Training Center near Amherst, Virginia.

The course is a study of the circuitry, installation, wiring and repair of key telephone systems. (A key system is an electro-mechanical switching system into which a number of separate telephone lines can be connected. In this way, one operator can answer a number of incoming lines.)

Fundamentals of key systems puts particular emphasis on having the student install new key systems and rectify troubles in working key systems. The instructor increases the amount of complexity of the troubles throughout the course, so that each student's knowledge of the equipment is similarly increased.

Reynolds joined the company in 1967 as an installer repairman.

Should my child take piano?

Yes. Few things so enrich life as understanding and appreciating music. Piano playing is in itself a rewarding creative outlet. At the same time, it encourages the development of a well-rounded personality; and it promotes concentration, alertness and poise.

What's the best age to start?

Anyone can start at almost any age, but it is ideal when piano lessons and school begin at the same time, since the two complement one another and one benefits the other.

Will my child practice?

Practice problems diminish with this attitude: practice is playing, and playing is fun. Parental expressions of pleasure encourage practice. An appreciative audience during practice acts like a tonic.

Beginner Piano Classes now being scheduled . . . Enroll your child in the most complete and comprehensive Piano Lab Course being taught today. Your child will thank you later!!!
